

OFFERING SHEET

Enterprise Data Quality

Transform enterprise data into trusted, accurate, and business-ready information. nFolks helps organizations improve data quality through automated profiling, validation, cleansing, standardization, and continuous monitoring, creating a trusted foundation for analytics, AI, and business operations.

THE OFFERING

A comprehensive data quality engagement that helps organizations assess, improve, and continuously monitor enterprise data. We profile data, implement quality rules, standardize critical data elements, and establish a scalable data quality framework that increases trust and supports enterprise data governance.

WHAT IS DELIVERED

Trusted, Accurate, and Business-Ready Data

- ✓ **Data Assessment & Profiling:** Profile enterprise data to identify quality issues, measure completeness, consistency, uniqueness, and accuracy, and establish baseline data quality metrics.
- ✓ **Data Quality Framework:** Design and implement enterprise data quality standards, business rules, validation policies, scorecards, and monitoring processes aligned with business and regulatory requirements.
- ✓ **Data Cleansing & Standardization:** Implement data cleansing, validation, standardization, matching, and enrichment processes to improve the quality and consistency of enterprise data assets.
- ✓ **Continuous Quality Monitoring:** Configure automated quality monitoring, scorecards, alerts, dashboards, and exception management to proactively identify and resolve data quality issues.
- ✓ **Training & Enablement:** Enable data stewards, administrators, and business users through hands-on training, best practices, operational procedures, and knowledge transfer to sustain long-term data quality initiatives.

DATA QUALITY SERVICES

Deliver end-to-end data quality services including assessment, profiling, rule implementation, data cleansing, standardization, quality monitoring, reporting, training, and ongoing operational support.

NFOLKS DATA QUALITY ACCELERATORS

Accelerate implementation using proven assessment methodologies, reusable quality rules, Rule definitions, automation utilities, validation frameworks, and best practices that improve data quality while reducing implementation effort and project timelines.

WHY nFolks

nFolks combines deep expertise in enterprise data quality, governance, and IBM Data & AI solutions with automation-driven delivery to improve the trustworthiness of business data. Our proven methodologies, reusable accelerators, and end-to-end implementation services help organizations establish sustainable data quality processes that improve operational efficiency, strengthen governance, and enable trusted analytics and AI.
