

OFFERING SHEET

DataStage NextGen Modernization

Modernize legacy IBM DataStage environments into a cloud-native, AI-enabled data integration platform powered by **IBM DataStage NextGen on watsonx.data Integration**. nFolks accelerates modernization through automated assessment, S2P conversion, validation, managed services, and operational enablement.

THE OFFERING

Modernize your IBM DataStage environment with a proven, automation-driven approach. We assess your existing platform, modernize legacy ETL assets, validate the converted workloads, and provide ongoing operational support to ensure a successful transition.

WHAT IT DELIVERS

Modern, Scalable, and AI-Enabled Data Integration

- ✓ **Assessment:** Assess your DataStage environment, inventory ETL assets, dependencies, Schedulers, and define a phased modernization roadmap
- ✓ **Modernization:** Convert Server Jobs to Parallel Jobs, migrate to DataStage NextGen by implementing reusable frameworks with AI-assisted automation, and optimize ETL workloads
- ✓ **Validation:** Validate functionality, verify performance, operational readiness and prepare workloads for production deployment
- ✓ **Managed Services:** Provide platform administration, performance monitoring, and ongoing operational support.
- ✓ **Training & Enablement:** Deliver administrator and developer training, knowledge transfer, and operational best practices.

DATASTAGE NEXTGEN SERVICES

Deliver end-to-end modernization services including assessment, planning, migration, validation, deployment, managed services, and user enablement for IBM DataStage NextGen.

NFOLKS DATADIOS ACCELERATORS

Accelerate modernization with proprietary automation for environment assessment, Server-to-Parallel conversion, ETL optimization, validation, and deployment. Reduce manual effort, lower migration risk, and shorten project timelines.

WHY nFolks

nFolks combines deep IBM DataStage expertise with automation-driven delivery to accelerate modernization with confidence. Our proven methodologies, DataDios accelerators, and end-to-end services reduce migration risk, shorten delivery timelines, and maximize the value of your DataStage NextGen investment.
