

OFFERING SHEET

IBM Knowledge Catalog Implementation

Build a modern, AI-enabled data governance foundation with **IBM Knowledge Catalog**. nFolks helps organizations accelerate data discovery, strengthen governance, improve data quality, and enable trusted, self-service access to enterprise data.

THE OFFERING

Implement IBM Knowledge Catalog to establish a centralized, enterprise-wide data catalog and governance platform. We help organizations discover trusted data, govern enterprise metadata, protect sensitive information, enrich business context, and enable AI-ready data for analytics and business users.

WHAT IT DELIVERS

Trusted, Governed, and AI-Ready Enterprise Data

- ✓ **Catalog & Discovery:** Discover enterprise metadata, build business glossaries, and implement a centralized data catalog for trusted data discovery
- ✓ **Governance:** Implement governance frameworks, workflows, stewardship processes, and business hierarchies to establish enterprise-wide governance.
- ✓ **Data Intelligence:** Enrich metadata, improve data quality, and integrate end-to-end lineage to increase trust and business context.
- ✓ **Managed Services:** Provide platform administration, governance optimization, compliance monitoring, and ongoing operational support.
- ✓ **Training & Enablement:** Deliver IKC, Data Quality, Platform Administration and business user training.

IBM KNOWLEDGE CATALOG SERVICES

Deliver end-to-end implementation services including governance assessment, metadata onboarding, business glossary development, data catalog implementation, governance workflows, data quality, lineage integration, training, and operational enablement.

NFOLKS GOVERNANCE ACCELERATORS

Accelerate IBM Knowledge Catalog implementation using proven governance frameworks, metadata onboarding accelerators, business glossary templates, automation, and best practices that reduce implementation effort, improve governance adoption, and shorten delivery timelines.

WHY nFolks

nFolks combines deep expertise in IBM Knowledge Catalog, enterprise data governance, and metadata management with automation-driven delivery to accelerate governance adoption. Our proven frameworks, governance accelerators, and end-to-end implementation services help organizations establish trusted, governed, and AI-ready data while reducing implementation effort and accelerating business value.
